ELECTRICAL HOMEOWNER AUTHORIZATION & INSPECTION REQUEST FORM

This form must be legible, clearly indicate the type of inspection requested and be made available to the attending Safety Officer in order to complete the inspection request process. It is strongly recommended that all inspection requests be made by submitting this completed form either by fax or email directly to the Electrical Section. Should you choose to request an inspection by calling the inspection request phone line, a completed copy of this form must be left on site at the main electrical panel. Re-Inspection fees may be assessed when an inspection of a previous noncompliance is performed (1 hour minimum charge). Electrical Safety Regulation 19 (4) states regulated work must not be concealed or energized unless inspected or the inspection has been waived.

DO NOT LET YOUR HOMEOWNER PERMIT EXPIRE. If an inspection request has not been received within 180 days from date of permit issuance or from last inspection date, a permit extension request must be submitted. For more information regarding homeowner permit requirements please visit http://www.surrey.ca/city-services/1374.aspx
