4. Final Approval:

- 4.1. General
- 4.2. Final Design Drawings

5. Appendix:

Certified Professional Program Forms & City of Surrey Standard Forms

1. Introduction

1.1 General:

The Certified Professional Program is recognized as a complementary program to the plan and field reviews processes for buildings in the City of Surrey. To become a Certified Professional, Registered Architects and Professional Engineers must successfully complete the Certified Professional Course and pass its examinations.

Registered Architects and Professional Engineers must be recognized under the terms of the City of Surrey's Certified Professional Program in order to be retained as Certified Professionals for building projects in Surrey.

1.2 City Building By-law:

In 1991, Surrey City Council passed an amendment to the Surrey Building By-law to allow for an alternative plan and field review process using Certified Professionals.

The term "Certified Professional" means an Architect or Professional Engineer registered to practice in British Columbia and accepted by the General Manager, Planning and Development Department as qualified under the Certified Professional Program as administered in Surrey.

1.3 Certified Professional Program:

The Certified Professional Program in Surrey has different requirements than Certified Professional programs in other cities or municipalities. Some of these differences are:

- The acceptability of phasing a project is determined based on particulars of the project.
- There is no Building Permit Application Form specific to the Certified Professional Program.
- The Certified Professional shall review building permit drawings for Code compliance in accordance with the requirements of the Certified Professional Program.
- Separate Letters of Assurance for tenant improvements
- Code coordination and site review, compliance to lot grading, on-site services, subdivision requirements, zoning by-law, and

development permit requirements are required.

- Letter of Assurance of an independent concept review of the structural design and structural drawings may be required.
- A monthly project site visit shall be arranged with the City Building Official, and a written site review report (see Appendix) must be submitted to the City Building Official. Copies of monthly field review reports by the Registered Professionals must accompany the written site review report. Depending on the type of project and the stage of construction, more frequent reports may be required.
- Tenant improvement applications made prior to the building receiving final occupancy are the responsibility of the Certified Professional. After provisional occupancy is granted for the building, the Certified Professional must continue the site review of the tenant improvement permits until they are finalized.

1.4 Role of a Certified Professional:

The Certified Professional is the liaison between the City of Surrey and the parties involved with the project (i.e., the owner, Coordinating Registered Professional, Registered Professionals, and Contractors). **The Certified Professional is responsible for communicating the project information that he/she is aware of, to the City, and from the City to persons involved with the project.** To ensure the Certified Professional is kept informed of the materials submitted for a building permit, all drawings and documents submitted must bear the Certified Professional's stamp and signature.

It is the responsibility of the Certified Professional to provide Code review and Code coordination for the design work and field reviews of the Registered Professionals in order to ascertain that the design will substantially comply with the British Columbia Building Code as shown on the drawings and specifications submitted for building permit. Field reviews are required by all the registered professionals, and site reviews are required by the Certified Professional, as he/she is acting in the capacity of the City Building Official.

All Code-related questions will be referred to the Certified Professional during the building permit process and subsequent field reviews.

The City will be available to provide code interpretations where the Certified Professional raises questions during the course of the Certified Professional's

work, either through a proposed Alternative Solution or an interpretation request from the Code Compliance Checklist.

In order for the Certified Professional Program to operate successfully, Certified Professionals are expected to be able to demonstrate a thorough knowledge not only of the British Columbia Building Code, but also of the City of Surrey's Bylaws, policies, and procedures applicable to the project. **Practicing as a Certified Professional in Surrey is an earned privilege.** The City expects the Certified Professionals' work to uphold the standards of Code Compliance of building projects in Surrey. **The General Manager of the Planning and Development Department or his/her designate qualifies, and also may disqualify, a Certified Professional in the City of Surrey pursuant to the Surrey Building By-law.**

1.5 Expected Duties of a Certified Professional:

Area Planning Division Approval [Development Permit/Rezoning/Variance Permit/Zoning Compliance]:

Where a project requires a Rezoning and/or Development Variance Permit, the City will not accept any building permit application if the development process has not passed third reading. Where a project requires a Development Permit, the City may, on an individual basis, accept a building permit application prior to issuance of the development permit. The Certified Professional should monitor the progress of the Rezoning, Variance, or Development Permit applications in order to determine when an application for a Building Permit can be made. **The Certified Professional must confer with the Architect of Record that there are no unauthorized deviations from the Approved Development Permit Drawings and conditions.** Area Planning Division staff must approve any proposed changes to the design. Note that while an application for a building permit sometimes may be made prior to issuance of the Development Permit, the Building Permit will not be issued until the Development Permit process is fully completed.

Engineering Department Requirements [Servicing Agreement/Works and Services]:

The Certified Professional is required to monitor the progress of the Servicing Agreement and related approvals, and relay the information requests from the Engineering Department to the project consultants. The Certified Professional is also required to check that the information on City services (City Works Engineering Drawings are available from front counter

of the Engineering Department) has been verified, and that the Registered Professionals have coordinated the off-site and on-site services.

Lot Grading, Site Drainage, and Retaining Wall Requirements:

Existing and proposed grades on the subject site and adjacent properties must be shown on the lot-grading plan. This plan must show the location of retaining walls and indicate those walls that require the involvement of a professional engineer in their design and construction. The Certified Professional is required to ensure that the preparation of Schedule B by the responsible professionals has been completed prior to application for the building permit.

The proposed means of controlling surface storm water flows must be shown on a site drainage drawing. Site drainage information must be coordinated with the building permit mechanical drawings.

Landscape Approval Requirements:

For a project that does not require a Development Permit, landscaping plans require review by the City's Landscape Architect.

For projects with an approved Development Permit, the Certified Professional is required to review the landscape drawings being submitted for the building permit for consistency with the Approved Development Permit drawings. A certification of completion from the Landscape Architect is required prior to Final Occupancy of the project.

Plumbing System Review:

The Certified Professional is required to monitor the progress of this review with the Plumbing Plan Reviewer and to coordinate the exchange of all pertinent information between the Plumbing Plan Reviewer and the consultant/designer. There is a standard procedure for a separate on-site servicing permit prior to issuance of the building permit (see Appendix for 'On-Site Services Installation Application'). The Certified Professional is required to be familiar with this procedure and to provide the owner and contractors with the correct information.

Electrical System Review:

The Certified Professional is required to monitor progress of this review with the Electrical Plan Reviewer, and to coordinate the exchange of all pertinent

information between the Electrical Plan Reviewer and the consultant/designer.

Mechanical System Review:

The Certified Professional is required to ensure that mechanically related fire emergency systems (such as dust collectors, paint spray booths and commercial kitchen exhaust systems) and fire suppression system drawings have been submitted to the Building Division for review and that all pertinent information is exchanged between the City's Fire Protection Engineer and the consultant/designer.

The installation of a pre-engineered fixed fire-extinguishing system such as a wet chemical or dry chemical system installation is considered to be included in the building permit. However, the installation of a sprinkler or standpipe system requires a separate plumbing permit application from a licensed sprinkler contractor.

Field Review Procedure:

The Certified Professional is required to ensure that each appropriate Registered Professional conducts field reviews and coordinates changes that may affect other disciplines (through the Coordinating Registered Professional). For all projects, field review reports are collected by the Certified Professional through the Coordinating Registered Professional and compiled as the record of satisfactory progress for the Final Occupancy of the project.

It is the responsibility of the Certified Professional to ascertain that all trade permits have been granted to the applicable contractor, such as plumbing, electrical, gas, sprinklers, hoarding, sewer, water connections, curb cuts, highway use, and any other permits that may be necessary.

Note that an exterior sign requires a separate Sign Permit Application. Signs must comply with the Surrey Sign By-law.

2. Procedures for Applying for a Building Permit

2.1 General:

The purpose of this section is to outline the requirements for the preparation and submission of drawings and supporting documents for a Building Permit Application in the City of Surrey.

An application for a building permit shall be for the entire project. However, 'phased' permits, such as excavation and foundation permits, may be considered for issuance depending on the circumstances of the specific project. A building permit application for a phase of a multi-phased project (such as townhouse developments) will generally be considered where each phase consists of separate building(s) and the phasing plan has been identified in the Development Permit.

Prior to making a building permit application, the Certified Professional should ensure that the correct civic address of the project is used. If a new legal description is pending, it must be registered at the Land Title Office before a building permit will be issued. All Letters of Assurance are to be complete with the correct civic address noted thereon.

The Building Permit Application form must have the owner's signature or the signature of the Certified Professional if he or she is acting as the owners' agent.

2.2 Building Permit Submission:

The Building Permit drawings must include two (2) sets of Code Compliance drawings (the use of black and white style with code compliance information marked with yellow highlighter is acceptable). The Certified Professional must also submit a Building Code analysis and compliance report, as well as a Building Code Checklist for Part 3 compliance.

The building permit will be issued based on a complete set of working drawings (see Appendix for 'Building Permit Application Checklist'). From time to time in the construction industry, permits are issued before the working drawings are prepared for the fabrication of a number of systems such as the mechanical system. When this occurs, the drawings submitted for permit issuance must show the preliminary design and location of all building components, highlighting the components that will be subject to further design.

The Certified Professional must clearly state the degree of completeness for the building permit drawings. A building permit will not be issued until the submission is deemed substantially complete.

Permits issued may be conditional on the submission of detailed drawings or working drawings. These working drawings must be reviewed and accepted by the Certified Professional and the City prior to the start of the relevant portion of work. In these cases, two (2) sets of each drawing shall be forwarded to the City for acceptance.

2.3 Other Approvals:

Certified Professionals must establish the requirements of other regulatory authorities such as the Ministry of Water, Land, and Air Protection and the Ministry of Transportation. The Certified Professional must demonstrate that the necessary approvals or clearances are in place before issuance of the building permit. A partial list of other regulatory authorities that the Certified Professional might need to contact, depending on the location, nature, and complexity of the project, is included in the Appendix.

2.4. Tenant or Landlord Improvements:

If a building has not yet been granted provisional or final occupancy by the City, any tenant or landlord improvement requires involvement of the Certified Professional. The Certified Professional must make the building permit application for the improvement, and will be responsible for the site reviews and compliance of the improvement work until it is substantially complete.

It is the responsibility of the Certified Professional to establish that the tenant's (or landlord's) proposal is compatible with the building shell and complies with the requirements of the British Columbia Building Code. This will include confirmation that the use of the unit, the intermediate floor areas, or other applicable general requirements, such as fire separations, interior finishes, exiting systems and health requirements, are in compliance.

2.4.1. Prior to Provisional or Final Occupancy:

The tenant/landlord improvement permit must be a Certified Professional Program submission. The Certified Professional must stamp all working drawings and submit Schedules CP-3, CP-4, and the tenant improvement checklist. An Architect's or Engineer's Design and Field Review may be required if the shell permit is deemed not to cover the full extent of work for the tenant/landlord improvement. For example, an office tenant improvement permit will require a

professional architectural review if the architect for the shell building will not take responsibility for its architectural components under Schedule B. The Certified Professional will be responsible for site reviews of the works related to the tenant/landlord improvement permit.

2.4.2. Upon Provisional or Final Occupancy:

Once the shell building has been granted final occupancy, subsequent applications for a building permit do not require the involvement of the Certified Professional. However, all tenant/landlord improvements that are in-stream will require the Certified Professional's site review until the works related to the tenant/landlord improvement permits are complete.

A building will be given Final Occupancy (Occupancy Permit) once all the works related to tenant/landlord improvement permits have been completed and accepted (See Appendix for the checklist). **The Certified Professional can recommend Final Occupancy and/or issuance of Occupancy Permit but cannot authorize occupancy of a building.** After the building has an occupancy permit, subsequent tenant/landlord improvement permits do not require the involvement of the Certified Professional.

Occupancy of the tenancy can occur only upon issuance of an occupancy permit or provisional occupancy by the City of Surrey.

2.5 Alternative Solutions:

Any Alternative Solutions to the requirements of the British Columbia Building Code must be proposed in writing from a Registered Professional for review and acceptance by the City, preferably before building permit application. The submission of the Alternative Solutions report must be accompanied by payment of the review fee. After issuance of a building permit, submission of proposals for Alternative Solutions is discouraged. Alternative Solutions submitted to compensate for design errors or faulty construction will not be accepted.

2.6 Liability Insurance:

The insurance disclosure letter CP-6 must be completed in full by the Certified Professional and owner, and submitted to the City prior to issuance of the building permit.

2.7 Construction Value:

Construction value shall be the complete monetary value of all construction or work related to the building, including, but not limited to: finishes, roofing, electrical, plumbing, drains, heating, air-conditioning, fire extinguishing systems, elevators, all other equipment and material, the current monetary worth of all plans and specifications, labour and fees for design, testing, consulting, management, contractor's profit and overhead, sales taxes, goods and services tax, insurance, the current monetary worth of all contributed labour and materials, and a reasonable value for site works and improvements not included in other permits. **The City estimates the value of work for determining applicable building permit fees based on the Marshall Swift Valuation Services Publication.**

3. Procedure during Construction

3.1 General:

After a building permit is issued, it is the responsibility of the Certified Professional to inform the City in writing, **within a week** of the commencement of construction that construction has begun.

3.2 Site Reviews:

Site review reports are to be filed by the Certified Professional **at least once every month**. If the Certified Professional is to be temporarily unavailable, the Certified Professional shall arrange, in consultation with the City, for the reports during the time of absence to be submitted by another Certified Professional or a Registered Professional. This will be monitored and evaluated on each project.

Scheduled Building Field Reviews by Building Officials will not be done for Certified Professional Projects. The Plumbing and Electrical Field Review staff will conduct scheduled Field Reviews after the necessary plumbing and electrical permits are issued (i.e. the Certified Professional can only perform building site reviews). The Certified Professional or the appropriate Registered Professional is expected to be able to address questions in the field related to Site and/or Field Reviews.

Random site visits may be made by Building Officials to review the status of the building relative to the Certified Professional's site review reports.

The Certified Professional is required to keep a record of all construction-related events during construction and if appropriate, the Certified Professional shall forward a copy to the City for reference.

3.3 Revision:

All changes after a building permit is issued must be documented through an amended building permit. There is an administrative charge for revisions. A revision to the Building Permit (see Appendix for 'Application for Acceptance of Revision') is required if changes affect:

- The structural design,
- Fire safety system or fire separation,
- Main entrance or public corridor on a floor,
- Exit to a public thoroughfare or to the exterior,
- Type of construction, location or openings of an exterior wall,
- Addition of usable floor space, either within or outside of the building envelope,
- Other design that does not substantially comply with the accepted building permit drawings, and
- Major changes to the Development Permit drawings (The Area Planning Division will determine if any change is a major change).

The Certified Professional must report to the City all deviations that change the exterior appearance or any item on the Development Compliance Checklist of the project relative to the Development Permit. Interpretation and rulings are made by the Area Planning Division.

4. Final Acceptance/Occupancy

4.1 General:

When a project constructed under the Certified Professional Program is ready for final acceptance and occupancy, the following procedure shall be followed:

- All necessary documents for fire and life safety systems tests applicable to the project are required to be submitted to the City for review. The Certified Professional is required to contact the Fire Department to determine whether a demonstration test will be required and, if required, to set the date and time for the test. The Fire Department will arrange for the appropriate City staff to attend the test. The demonstration test will usually precede the Group Final

Inspection.

- All necessary documents and final design drawings (if design changes transpired during construction) will be required to be submitted to the City for review and acceptance before the Group Final Inspection (see Appendix for "Documentation Required Prior to Occupancy" Checklist).
- The Certified Professional is required to contact the City to set up a Group Final Inspection. City staff will contact the Fire Department, the Plumbing Section, and the Electrical Section to organize the Group Final Inspection. The Certified Professional shall submit all required final approvals from other applicable regulatory authorities, such as the Elevator Branch and Gas Safety authorities, prior to requesting a Group Final Inspection.
- The Certified Professional is required to contact the City's Landscape Architect's office to set up an Inspection for the landscaping.
- Final acceptance and occupancy permit status will be considered based on the recommendation of the Certified Professional. The Certified Professional can recommend final acceptance, and occupancy can occur only upon issuance of an occupancy permit by the City. Any deficiencies observed during the Group Final Inspection are required to be forwarded, in writing, to the City immediately after conclusion of the Group Final Inspection. All deficiencies documented during the Group Final Inspection must be corrected before making the request for any re-inspections.

4.2 Final Design Drawings (Record Drawings):

Final design drawings are not required to be submitted to the City if the Certified Professional verifies that the accepted building permit drawings were complete and the final design substantially complies with the original building permit drawings.

If the final design does not substantially comply with the accepted building permit drawings, the Certified Professional shall not request a final group inspection until a revision permit application along with revised drawings and a list of changes is submitted and accepted by the City. Revised drawings shall be submitted for each discipline in which the changes are applicable. All revised drawings must comply with the conditions of the approved Development Permit for the project.

5. Appendix

Certified Professional Program Forms:

- Building Permit Application Checklist
- CP Building Code Checklist
- Confirmation of Commitment by Owner and Certified Professional (Schedule CP-1)
- Confirmation of Completion of Code Coordination (Schedule CP-2)
- Confirmation of Tenant Improvement Compatibility (Schedule CP-3)
- Assurance of Tenant Improvement Code Coordination and Commitment for Field Review (Schedule CP-4)
- Confirmation of Completion of Tenant Improvement Code Coordination and Site Review (Schedule CP-4A)
- Assurance of Independent Review of Structural Design Concept (Schedule CP-5)
- Insurance Disclosure of Certified Professional (Schedule CP-6)
- Assurance of Lot Grading, On-Site Services, and Retaining Wall Compliance (Schedule CP-7)
- Building Permit Application Checklist for Tenant Improvement
- Documentation Prior to Occupancy Checklist
- Project Directory
- Monthly Site Review Report Form
- List of Contact Personnel
- Regulatory Authorities List

Building Permit Application Checklist

The following documentation is to be completed and submitted with the Building Permit Application for all new buildings and additions:

Project Address: Date:

<input checked="" type="checkbox"/>	Documents & Drawings
<input type="checkbox"/>	Building Permit Application Form
<input type="checkbox"/>	Cheque for Building Permit Fees Deposit
<input type="checkbox"/>	Building Information Sheet
<input type="checkbox"/>	Project Directory
<input type="checkbox"/>	State of Title Certificate (Title Search)
<input type="checkbox"/>	Surrey Zoning Analysis for the Building in accordance with the applicable Surrey Zoning By-law, "Development Data Sheet", and "Development Permit Compliance Checklist"
<input type="checkbox"/>	Four (4) sets of applicable drawings signed and sealed (original seals and signatures), including Architectural, Excavation & Shoring, Civil (site servicing), Lot Grading (including retaining walls), Structural (including retaining walls), Mechanical, Plumbing, Fire Suppression, Electrical, Legal Survey (of the property), and Landscaping
<input type="checkbox"/>	Two (2) sets of Code Compliance drawings (use of black and white style with code compliance information marked with yellow highlighter is acceptable)
<input type="checkbox"/>	Building Code Analysis and Compliance report prepared by the Certified Professional
<input type="checkbox"/>	Proof of approval from other Regulatory Authorities (If applicable)
<input type="checkbox"/>	"Confirmation of Commitment by the Owner and Coordinating Registered Professional" form, "Assurance of Professional Design and Commitment for Field Review" forms (Schedules A and B of the British Columbia Building Code) and proof of liability insurance coverage for all Registered Professionals
<input type="checkbox"/>	Building Code Checklist (Part 3 compliance) completed by the Certified Professional
<input type="checkbox"/>	"Confirmation of Commitment by Owner and by Certified Professional" (Schedule "CP-1")
<input type="checkbox"/>	"Assurance of Independent Review of Structural Design Concept" (Schedule "CP-5")
<input type="checkbox"/>	Insurance Coverage Disclosure and Owner's Acknowledgment (Schedule "CP-6")
<input type="checkbox"/>	Assurance of Lot Grading, On-site Services, and Retaining Wall Compliance Letter (Schedule "CP-7")
<input type="checkbox"/>	Original copy of the Soils Report sealed by the Registered Geotechnical Engineer
<input type="checkbox"/>	Alternative solutions report with review fees (if applicable)
<input type="checkbox"/>	Soils Deposition Letter
<input type="checkbox"/>	Damage Deposit Form
<input type="checkbox"/>	Site Profile (i.e. Review Process for Contaminated Sites - if applicable)
<input type="checkbox"/>	All sub-consultants' drawings and documents bearing the Certified Professional's stamp and signature
<input type="checkbox"/>	The Homeowner Protection Office (HPO) Forms – Residential Project Only
<input type="checkbox"/>	Requirements of the Erosion and Sediment Control By-law No. 16138 (Projects requiring ESC Permit)

I confirm the drawings submitted are _____ % completed. In addition, I have reviewed all the documents for the correct address and legal description.

Confirmation of Commitment by *Owner* and "Certified Professional" CP-1

- Notes:**
1. This letter is endorsed by the Architectural Institute of British Columbia and the Association of Professional Engineers and Geoscientists of the Province of British Columbia.
 2. The phrase "Building Code" where used in this letter means the British Columbia Building Code.
 3. Words in italics are given the same meaning as defined in the British Columbia Building Code.
 4. Words in "quotations" are defined herein.

To: **Chief Building Official**
City of Surrey
13450 – 104 Avenue
Surrey, BC V3T 1V8

Date: _____

Project Address: _____ Building Permit No.: B ____ - _____

In signing and submitting this document to the *Chief Building Official* the *owner* confirms that the *owner* has authorized the "Certified Professional (CP)", to undertake "code coordination" and the undersigned "CP" confirms that the "CP" will undertake "code coordination" with respect to the above noted project for which a building permit is sought.

"Code coordination" includes the following tasks:

1. act on behalf of the *owner* as the *owner's* representative in matters involving the City of Surrey in relation to the building permit, related project construction and related occupancy permit;
2. ascertain that the required *registered professional of record (RPR)* for the project have been retained to provide *design and field review* in accordance with the "Building Code";
3. obtain the necessary letters of Assurance of Professional Design and Commitment for Field Review from the *registered professionals of record* for the project and deliver the originals of same to the *Chief Building Official* when applying for the building permit for the project;
4. obtain the other necessary documents required to support the building permit application and deliver same to the *Chief Building Official* when applying for the building permit for the project;
5. apply for and obtain a building permit for the project in accordance with the process as described in the City of Surrey Building By-law;
6. provide "design review" of the plans and supporting documents prepared by each of the *registered professionals of record* for the project;
7. ascertain that the *registered professionals of record* have incorporated in their plans and supporting documents, the requirements of the "Building Code" Division A; Division B Parts 1 and 3; and Division C;
8. ascertain that the Division A; Division B, Parts 1 and 3; and Division C "Building Code" requirements governing the project are compatible between the plans and supporting documents prepared by each *registered professional of record*;
9. provide "site review" of the components of the plans and supporting documents prepared by each of the *registered professionals of record* for the project;

Schedule CP-1 Continued

10. keep records of all "site reviews" by the "CP" and of any corrective action required and taken as a result of these "site reviews". Discrepancies noted during "site reviews" must be tracked and the resolution of these discrepancies noted such that a list of significant known unresolved discrepancies can be provided at the request of the *Chief Building Official*;
11. "monitor *field review* activities" of the *registered professionals of record*;
12. monitor and report on significant events and changes in the project;
13. submit a monthly summary progress report to the *Chief Building Official* during construction of the project;
14. consult with the *Chief Building Official* if any unresolved variances in interpretation of the "Building Code" arise between the "CP" and the *registered professionals of record*;
15. consult with the *Chief Building Official* if any unresolved issues with respect to the "Building Code" arise between the "CP" and the contractor;
16. review relevant shop drawings with respect to the requirements of Division A; Division B, Parts 1 and 3; and Division C of the "Building Code";
17. notify the *Chief Building Official* in a timely manner of any significant known, unresolved contraventions of the "Building Code" or building permit requirements;
18. obtain the necessary letters of Assurance of Professional *Field Review* and Compliance from the *registered professionals of record* for the project and deliver the originals of same to the *Chief Building Official* when applying for the occupancy permit for the project;
19. obtain the other necessary documents required to support the occupancy permit application and deliver same to the *Chief Building Official* when applying for the occupancy permit for the project;
20. apply for the occupancy permit for the project in accordance with the process as described in the City of Surrey Building By-law; and
21. apply the "CP" stamp to all relevant documents that are submitted to the *Chief Building Official*. Affixing his or her "CP" stamp to a document confirms that the "CP" has provided the relevant portion of "code coordination" applicable to that document.

"Design review" means the activities necessary to ascertain that the design of the project will substantially comply, in all material respects, with the requirements of Division A; Division B, Parts 1 and 3; and Division C of the "Building Code".

"Monitoring *field review* activities" means ascertaining that the *registered professionals of record* are providing *field reviews* as required by Div C, Part 2 of the "Building Code", and includes keeping records of the *field review* reports prepared by the *registered professionals of record*. The *owner* will instruct each *registered professional of record* to highlight in the *RPR's* field review reports any significant variation from the documents accepted in support of the building permit and any corrective action as needed. The "CP" will review the variations highlighted in the *field review* reports and notify the *Chief Building Official*, in a timely manner, of significant known unresolved contraventions from the documents accepted in support of the building permit.

"Site review" means the activities necessary in the "CP's" professional judgment to ascertain that the construction of the project substantially complies, in all material respects, with the requirements of Division A; Division B, Parts 1 and 3; and Division C of the "Building Code" and the requirements of the building permit and monitors for compliance with the development permit issued for the project.

Schedule CP-1 Continued

In addition to "code coordination" the undersigned *owner* and "CP" also acknowledge that:

1. If the project involves future tenant improvement works, and the base *building* occupancy is not achieved prior to commencement of the tenant improvement works, the involvement of a "CP" may be required; and
2. The *owner* and the "CP" are each required to notify the *Chief Building Official* on or before the date the "CP" ceases to be retained by the *owner*. It is understood that work on the above project will cease as of the effective date of such termination, until such time as a new appointment is made, and a *Stop Work Order* shall be posted upon the said project by the *Chief Building Official*.

Note: This letter must be signed by the *owner* (or the *owner's* appointed agent) and the "CP". If an agent is signing, a copy of the document that appoints the agent must be attached. If the *owner* is a corporation, this letter must be signed by a signing officer of the corporation and the signing officer must set forth his/her position in the corporation.

Assurance of Compliance Lot Grading, On-site Services, Retaining Wall CP-7

(applicable only for sloped sites with retaining walls, where the underground parkade does not cover the entire site)

Chief Building Official
City of Surrey
13450 – 104 Avenue
Surrey, BC V3T 1V8

Date: _____

Re: Project Address: _____

The undersigned hereby gives assurance that the lot grading and on-site services design drawings submitted for the above project comply with City of Surrey Building Bylaw. The drawings indicate the existing and proposed grades, the proposed means of controlling surface flows, and the requirement for retaining walls.

I confirm that I am the engineer of record for the structural design of the retaining walls and that I have also submitted a Schedule B for the Structural and/or Geotechnical discipline together with the drawings bearing my professional seal.

Furthermore, I confirm that all applicable drawings have been checked to ascertain all information is cross-referenced between drawing sets.

Note: Please cross out and initial items that are not under the responsibility of the undersigned Registered Professional.

Tenant Improvement Building Permit Application Checklist

Project Address: Date:

Legal Description: Unit No:

The following documentation and information is to be submitted with the Building Permit Application for all the tenant improvements.

Note: An application for a business license must be made at City Hall Bylaw and Licensing Division prior to making the building permit application.

Completed Bylaw & Licensing Inquiry Form has been submitted to Bylaw & Licensing Division (copy attached)

Name of business to occupy the unit:

Complete site address (Including unit number):

On which storey in the building: Is the unit sprinkler-protected? Yes No

Number of parking spaces allocated for the unit:

Floor area of unit (square feet or metres) Occupant load of the unit

Four (4) sets of drawings (Site Plan, Architectural, Mechanical, Plumbing, and Electrical, as applicable) are required. Drawings must include, but not limited to, the following:

Key Plan:

-
- Dimension of the site
- Location of the building on the property
- Street Name(s)
- Legal Description
- Street address, floors, and tenant unit numbers
- Location of parking spaces for the unit
- Indicate area to be developed and adjoining occupancy (ies)
- Location of firewalls if existing
- Unit number of all tenants spaces in the building

Tenant Floor Plan:

-
- Identify adjacent tenant
- Label all areas (e.g. office)
- Fully dimension floor area including mezzanines and second storeys
- Show exits, corridors, and stairs
- Show travel from mezzanines and second storey
- Specify fire resistance rating of mezzanine or second floor assembly
- Door schedule
- Indicate wall structure (written description or cross section(s))
- Sprinkler system layout indicating existing and proposed installation
- Details regarding Spray Booth, Kitchen Exhaust Canopy, and Dust Collection System as applicable

Other Requirements:

-
- Health Department Approval is required where food or personal services are provided
- Schedule CP-3 (Assurance of Tenant Improvement Compatibility) and Schedule CP-4 (Assurance of Tenant Improvement Code Coordination & Commitment for Site Review), if the base building has not received occupancy
- Schedule CP-1 (Confirmation of Commitment by Owner and Certified Professional) and Schedule CP-6 (Insurance Disclosure of Certified Professional), if the base building has received occupancy
- Schedule CP-5 (Assurance of Independent Review of Structural Design Concept), if the tenant improvement involves a Structural Engineer of Record
- Complete Letter of Assurance by sub-consultants, as applicable

I have reviewed all documents with respect to the correct address and legal description.

Certified Professional: Date:

Note: It is the duty of the Certified Professional to establish that the tenant's proposal is compatible with the building shell and also conforms to the requirements of the BC Building Code. This will include a confirmation on the use of the unit, the intermediate floor areas, and that other applicable general requirements such as the exiting system and health requirements are met. If the tenant improvement is occurring before the substantial acceptance of the shell, the Certified Professional is responsible for the site review of the related works.

All documents and drawings shall possess stamp and signature of the Certified Professional.

(Affix Certified Professional Stamp)

Documentation Prior To Occupancy Checklist

Certified Professional is to ensure all the following items are arranged and submitted to the City of Surrey before the Group Final Inspection.

On-Site Services Installation Prior to Building Permit Issuance

Project Address:

Building Permit No.: Engineering Project No.:

As the property Owner, or Owner’s Agent, for the above-referenced project, I am requesting to be allowed to proceed with the installation of on-site services prior to the issuance of a Building Permit. By my signature below I:

1. commit that no work will commence until a Plumbing Permit for On-Site Services has been issued,
2. acknowledge that a permit will not be issued until all conditions listed below have been met, and
3. agree that once an On-Site Services Plumbing Permit is issued I will:
 - a. ensure that a copy of the accepted Site Servicing drawings is available on-site at all times,
 - b. obtain inspection approvals from the Engineer(s) of record,
 - c. obtain acceptance from the Building Official, and
 - d. correct all building, plumbing, or electrical deficiencies related to the installed on-site services and bear all costs related to the corrective work to said services, regardless of City acceptance of work.

Applicant/Owner’s Name: Date:

Signature:..... (Affix Certified Professional Stamp)

*** Submit this form to the Plan Reviewer for completion.**

Office Use Only

1. Approval of the Development Permit and the Zoning. Compliance with Zoning By-law 12000.

Planning Division: _____ Date: _____

2. Completion of the Service Agreement process and approval of soil removal/deposition.

Engineering Department: _____ Date: _____

3. Acceptance of the lot-grading plan.

Drainage Engineer: _____ Date: _____

4. Compliance with the Tree Preservation By-law and Development Permit (Landscape Security Deposited.)

Landscape Architect: _____ Date: _____

5. Verification that Building Permit Application is complete, including all required Letters of Assurance.

Plan Reviewer: _____ Date: _____

6. Acceptance of the on-site services plan.

Plumbing Inspector: _____ Date: _____

- The Plan Reviewer will confirm completion of the items listed above then forward a copy of this completed form to the Plumbing Section, with a copy of the accepted Site Servicing drawings.
- The Plumbing Section will provide the Plumbing Contractor with a copy of the accepted drawings once the Site Servicing Plumbing Permit has been issued.

Soil Deposition Letter

Date:

Project Address:

Building Permit No.:_.....

This is to confirm that all soil to be removed from the above referenced project site will be deposited in accordance with the Surrey Soil Conservation and Protection By-law.

We will also undertake daily road cleaning and traffic safety controls in accordance with applicable By-laws.

Specifically,(volume in m³) is to be excavated, and this volume will be deposited at(address of deposition site).

Owner's Name:

Owner's or Authorized Agent's Signature:

(Affix Stamp of Certified Professional)

Damage Deposit Form

This deposit is to ensure repair of any damage to Municipal properties. By using the following suggestions, damage may be reduced or eliminated.

BEFORE CONSTRUCTION:

Check area. The water service shut-off should be visible (or easily uncovered), the storm and sanitary connections marked, the sidewalk, curb and road not damaged or broken. If there is an inspection chamber (sanitary sewer), check for damage. If there is any damage, return the completed Pre-Damage Inspection form to the Engineering Department.

Note: Report any damage at least one week prior to expected issuance of permit.

DURING CONSTRUCTION:

- Water Connection - Check the shut-off depth. If it is too high or too deep, adjust the top to the ground surface when connecting. Be careful not to kink or bend the service pipe. If connection will be located in a driveway, protect it with a box and lid as per Surrey Standard Drawings W.3 and S.18.
- Sewer Connection - Check the grade on the connection before connecting. If there is a problem, call Plumbing Section. Take care not to cross connect the storm and sanitary sewers. If the cleanout or inspection chamber will be located in a driveway, protect it with a box and lid as per Surrey Standard Drawing S.18.
- Ensure that contractors and sub-contractors do not damage the sidewalk, curb, or road by excavation or by running heavy equipment over them. Remember that you will be responsible for their actions.
- Do not pile work, debris, or building materials on the City Boulevard, sidewalk, and road right-of-way. Do not block the road, hydrants, or sidewalks. The road and sidewalk must be kept reasonably clean during construction.

Remember, you will be held responsible for all costs if clean up by City crews become necessary.

AT COMPLETION OF CONSTRUCTION (Before request for final field review):

- Clean up the road, gutter, and sidewalk. Remove all debris from the boulevards.
- Check the water service shut-off and/or sanitary inspection chamber are both vertical, undamaged and visible.

- If no deficiencies are outstanding and no damage to City property has been incurred, the deposit will be returned.

Damage Deposit Refunded to: **Builder/Owner** (Circle applicable)

Name:

Current Mailing Address:

City: Postal Code:

Phone: Email:

Damage Deposit may be paid by Cash or Letter of Credit.

Interest is not paid on cash security.

Project Address:

I have read the above information sheet and advise that there is no visible damage to City property or services fronting the lot on which I propose to build, other than that which has already been reported.
