ADDENDUM NO. 2

REQUEST FOR QUOTATIONS (RFQ) NO.:	1220-040-2017-017
TITLE:	ROAD WEATHER INFORMATION SYSTEM (RWIS)
ADDENDUM ISSUE DATE:	JANUARY 11, 2017
CLOSING DATE:	PREFER TO RECEIVE QUOTATIONS ON OR BEFORE JANUARY 20, 2017

INFORMATION FOR CONTRACTORS

This Addendum is issued to provide additional information and clarifications to the RFQ for the above named project, to the extent referenced and shall become a part thereof. No consideration will be allowed for extras due to the Contractor not being familiar with this Addendum. This Addendum No. 2 contains two (2) pages in total.

Q.1. The “Fees and Payment” table in Schedule B, Section B-2 appears to be for some other type of product (not RWIS). Please clarify.

A.1. The table provided is an example. If you have a different pricing table that works for your pricing model or solution, please use that.

Q.2. Can the City clarify that each line item in the “Fees and Payment” table in Schedule B, Section B-2 is a per station rate?

A.2. A per station rate is preferred but not required. Pricing may be submitted as a total per line or any other Quotation method that makes sense for your individual solution.

Q.3. In the “Fees and Payment” table in Schedule B, Section B-2, can the City provide line items for the data management requirement or is it expected that the Contractor will provide a separate worksheet with data management costs?

A.3. The “Fees and Payment” table is a sample only. The Contractor may use a different table if it suits the solution more appropriately or add a line(s) to the existing table.

Q.4. Can the City further clarify what is required in Schedule A, 3.0 (a) “Remote / wireless monitoring of the project sites is not required provided the Contractor conducts regular field visits to ensure quality assurance/quality control can be accomplished.”

A.4. The City is requesting near real-time information with the successful Contractor providing all controls and technology to accomplish this goal.

Q.5. Can the City further explain the multiple image capability for the camera? Is it required to provide a Pan-Tilt-Zoom (PTZ) camera that can take multiple images of different locations?

A.5. The City is requesting the Contractor to provide a solution that accomplishes the request. The Contractor is free to provide a Quotation on whichever solution does this best.

Q.6. Schedule A, 1.0 General Description, (b), (1), (A) requests sensor based alerts. Can this be accomplished with a hosted software package?

A.6. The City is requesting the Contractor to provide a solution that accomplishes the request. The Contractor is free to provide a Quotation on whichever solution does this best.

Q.7. The RFQ describes in detail data collection and analysis. We assume that the City also would like near real-time monitoring capability so city personnel can view the data. Is our assumption correct?

A.7. Yes.

Q.8. With respect to Addendum No. 1, it is indicated that the equipment may be installed on street light poles and that AC power will be available. Some poles operate with photocells and the power is not active during daylight hours. Will the AC power at the poles be continuous for RWIS operation?

A.8. Yes.

Q.9. Which measured parameters specifically (i.e. air temperature, humidity, wind speed, wind direction, etc.) are required to be field verified per 3.3.2?

A.9. All measured parameters (i.e. air temperature, humidity, wind speed, wind direction, etc.) are required to be field verified.

END OF ADDENDUM

All Addenda will become part of the RFQ Documents.
