This plan makes reference to ground-level distance measurements  
 obtained specifically to compute grid distances and city  
 ground-level distances by the average combined factor of  
 0.20350%, which has been defined from geodetic  
 control monuments 5603 and 5629.

The UTM coordinates and estimated absolute accuracy  
 obtained have been derived from the Geoid Height  
 potential coordinates and standard deviations for  
 geodetic control monuments 5603 and 5629.
