

and once the contractor has completed all of the work to the satisfaction of the City the Security Deposit is returned to the depositor in full. If there are any concerns with the work carried out, then all or part of the Security Deposit may be held for a one-year maintenance period.

The As-built Deposit is now proposed to be included in the Security Deposit because past practice has shown that people prefer to provide one combined Deposit to the City. This deposit is refundable upon submission of the as-built drawings of the completed works and final approval of the works.

Legal Services Division has reviewed the proposed amendments and find them acceptable from a legal perspective.

Appendix II provides a comparison of existing and proposed fees.

## **CONCLUSION**

The recommended amendments to Schedule B, Uses Requiring Permits – Schedule of Fees of the Highway and Traffic By-law, 1997, No. 13007, will bring the fees more in line with the current costs of doing business.
