SCOPE OF WORK

As part of the Safe and Active Schools Program which was an 'Early Action' within the Transportation Strategic Plan, Engineering staff undertook a review of safety of the streets and pedestrian access in the vicinity of each of the 120 public elementary and secondary schools in Surrey. The program is intended to establish and maintain a safe and comfortable environment for walking to and from school. The program identifies measures for each of the 120 public elementary and secondary schools in Surrey including sidewalks, curb bulges, crosswalks, traffic calming and parking restrictions. Contract M.S. 1711-011-11 is one of three contracts that support the above mentioned review and which collectively will represent the largest construction program of its kind in the Province.
