ADDENDUM #2

REQUEST FOR QUOTATIONS (RFQ) No. : 1220-040-2023-039

**TITLE: RELINE AND POINT REPAIR PROGRAM –
SANITARY SEWER MAINS AND
LATERALS**

ADDENDUM ISSUE DATE: July 10th, 2023

**CLOSING DATE: Prefer to receive Quotations on or before
July 18th, 2023**

INFORMATION FOR CONTRACTORS

This Addendum is issued to provide additional information to the RFQ for the above-named project, to the extent referenced and shall become thereof. No consideration will be allowed for extras due to the Contractor not being familiar with this Addendum. This Addendum No. 2 contains three (3) pages in total.

QUESTIONS AND ANSWERS:

Q.1. Refer to Schedule B – Appendix 3 – Supplementary Specifications (Project):

The [underlined] areas below state all items to be included in these works. At this time, we do not know how many services are in each of these lines and this could vary from 0 to 30 per line. Each of these is to be reinstated and interface grouted. The cost difference could be substantial. Would it not be better to have unit rates for the service cutting, hub cutting and interface grouting? This is in regards to Package A and Package B.

SSP 16 Reline Mainline

Payment for relining of a sanitary sewer mainline shall be made per each mainline segment, manhole to manhole at the tendered unit prices under Schedule C – Form of Quotation for the appropriate pipe diameter, and shall include flushing and cleaning the sanitary sewer line, degreasing, root cutting, cutting protruding hubs, removing debris, pre/post relining Closed Circuit Television (CCTV) inspection and reporting of the

sanitary sewer line, identifying service connection locations, determining actual liner length, liner design and submission of sample for testing, notifying residents, restricting and diverting sewage flow from mainline and service connections if required, provision of traffic control, supply and installation of relining, end grouting and testing, service connection reinstatement including interface grouting and testing, and any other related work.

SSP 17 Reline Service Connections (Sanitary Laterals)

Payment for relining sanitary sewer service connections shall be made per each service connection segment, inspection chamber or property line to mainline or manhole at the tendered unit price under Schedule C – Form of Quotation for the appropriate pipe diameter, and shall include flushing and cleaning the sanitary sewer line, degreasing, root cutting, cutting protruding hubs, removing debris, pre/post relining Closed Circuit Television (CCTV) inspection and reporting of the sanitary sewer line, determining actual liner length, liner design and submission of sample for testing, notifying residents, restricting and diverting sewage flow from mainline and service connections if required, provision of traffic control, supply and installation of relining, end grouting and testing, service connection reinstatement including interface grouting and testing, and any other related work. The intent is to utilize a service connection reline system that addresses the interface area to ensure a complete, sealed system. Where possible a lateral and main/lateral connection reline method shall be implemented and the cost reflected in Schedule C – Form of Quotation. This approach shall also be utilized where connections enter directly into a manhole.

A.1.

- (a) Delete SSP 16 Reline Mainline as issued for quotation in its entirety and substitute with the below: Refer to SSP 16 Reline Mainline:

“SSP16 Reline Mainline

Payment for relining of a sanitary sewer mainline shall be made per each mainline segment, manhole to manhole at the tendered unit prices under Schedule C – Form of Quotation for the appropriate pipe diameter, and shall include flushing and cleaning the sanitary sewer line, degreasing, root cutting, removing debris, pre/post relining Closed Circuit Television (CCTV) inspection and reporting of the sanitary sewer line, identifying service connection locations, determining actual liner length, liner design and submission of sample for testing, notifying residents, restricting and diverting sewage flow from mainline and service connections if required, provision of traffic control, supply and installation of relining, end grouting and testing, and any other related work. “

- (b) Delete SSP 17 Reline Service as issued for quotation in its entirety and substitute with the below: Refer to SSP 16 Reline Mainline:

“SSP 17 Reline Service Connections (Sanitary Laterals)

Payment for relining sanitary sewer service connections shall be made per each service connection segment, inspection chamber or property line to mainline or manhole at the tendered unit price under Schedule C – Form of Quotation for the appropriate pipe

diameter, and shall include flushing and cleaning the sanitary sewer line, degreasing, root cutting, removing debris, pre/post relining Closed Circuit Television (CCTV) inspection and reporting of the sanitary sewer line, determining actual liner length, liner design and submission of sample for testing, notifying residents, restricting and diverting sewage flow from mainline and service connections if required, provision of traffic control, supply and installation of relining, end grouting and testing, service connection reinstatement including interface grouting and testing, and any other related work. The intent is to utilize a service connection reline system that addresses the interface area to ensure a complete, sealed system. Where possible a lateral and main/lateral connection reline method shall be implemented and the cost reflected in Schedule C – Form of Quotation. This approach shall also be utilized where connections enter directly into a manhole.”

For Package B – Laterals, interface grouting shall be included in the price of the reline. Unit pricing for hub cutting should be provided per Schedule C, section 10, SP-2, in the event that this service is required to successfully complete the assigned reline work.

(c) Refer to Schedule C – Quotation, section 10 List of Separate Prices:

Add SP-3 and SP-4:

Description of Separate Prices	Addition	Deduction
SP-3 Unit Pricing for Main Service Connection Reinstatement	\$[]	\$[]
SP-4 Unit Price for Main interface Grouting	\$[]	\$[]

– END OF ADDENDUM –

All Addenda will become part of the RFQ Documents.
